David Palacios, Full Stack Developer

I've been writing code since the age of 14 and have developed extensive experience working with a multitude of frameworks and languages. I'm passionate about building software and firmly believe that anything is possible with code. I always make sure that all projects are completed to the highest standards of quality and performance because delivering great results is something I am proud of.

Skills

jQuery	

Employment History

Full Stack Developer at Cover Whale, Remote - Full Time

June 2021 — Present

My responsibilities as a Full Stack Developer at Cover Whale include:

- Design and implement new features for the company web application using PHP, Laravel, and Vue.js.
- Maintain and optimize existing features to improve the application's performance and user experience.
- Work collaboratively with cross-functional teams to deliver high-quality software on schedule and to specification.

Skills and tools used at Cover Whale include: Laravel, PHP, Vue.js, JavaScript, jQuery, Confluence, Jira, Bitbucket and Git.

Full Stack Developer at TYBO Agency, Remote - Freelancer

August 2019 — Present

As a Full Stack Developer at TYBO Agency I'm responsible for the development of custom solutions for our customers, such as:

- Vue.js development
- Shopify applications

- Integrations with the Shopify API
- Stores customization
- Custom API solutions and endpoints
- Linux server management for our custom solutions

Skills and tools used at TYBO Agency include: Vue.js, JavaScript, jQuery, HTML, CSS, PHP, Linux Containers, Shopify REST API and Trello.

Content Creator and QA at Styde Limited, Remote - Full Time

February 2017 — April 2020

As a member of the Styde team I worked on a variety of areas:

- Contributed to the translation of the Laravel documentation and a popular Vue.js book from English to Spanish, enabling Spanish-speaking developers to access high-quality resources for these technologies.
- Provided technical support to students, helping them to troubleshoot issues related to Styde's content.
- Stayed up-to-date with the latest trends and technologies in web development, incorporating new techniques and tools into Styde's publications.

Skills and tools used in Styde include: Laravel, PHP, Vue.js, JavaScript, Git, Github, Trello, Laravel Components and Markdown.

Languages	◯ **Spanish** Native speaker	◯ **English** Highly proficient

Other Experience

2011

Worked as a teacher in a computer academy. I was just a 15 year old kid teaching programming to engineering students. It was amazing.

2012

Created a web development agency when I was just 16 years old and actually managed to get a couple of clients.

2013

Developed a custom blogging CMS using PHP & MySQL without a framework.

2014

Worked in the development of a custom medical system for ophthalmologists. Used open source tools to find a way around to use medical and tax equipment through a web system.
